

TAKA ENERGY

Transformando Resíduos em Energia Limpa

Yury Francisco

May 2026

THE PROBLEM

Exposure to Kitchen Smoke

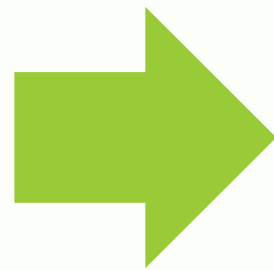

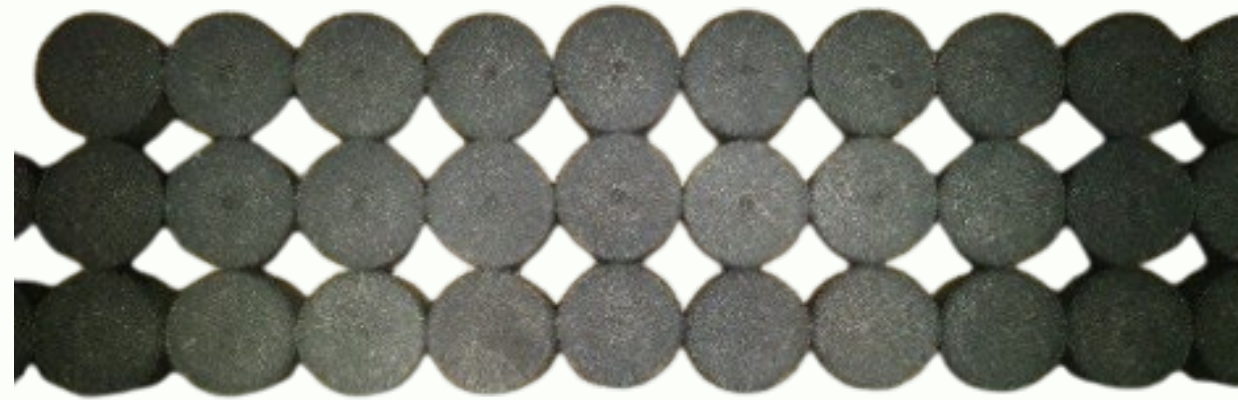

3.8 million women have died prematurely (WHO, 2025).

Urban and Agricultural Waste

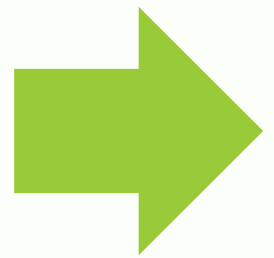

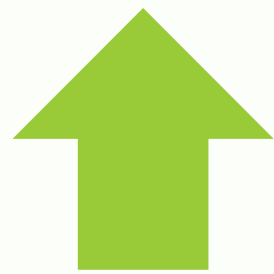

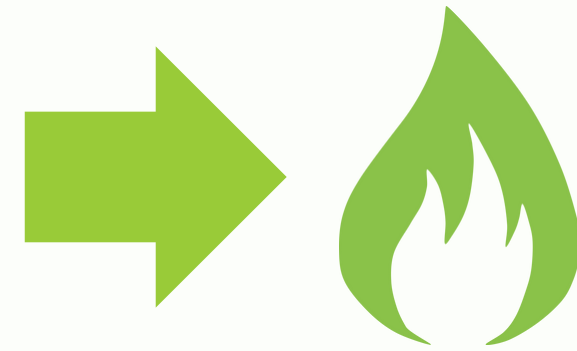

10,500 t of domestic MSW/day.

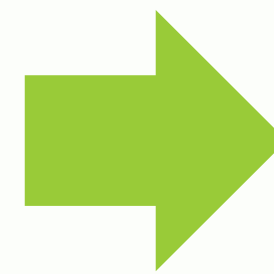

THE SOLUTION

Briquettes
(Macala Green®)

Biodigestores
(Kaya Biodigestor ®)

VISION AND VALUE PROPOSITION

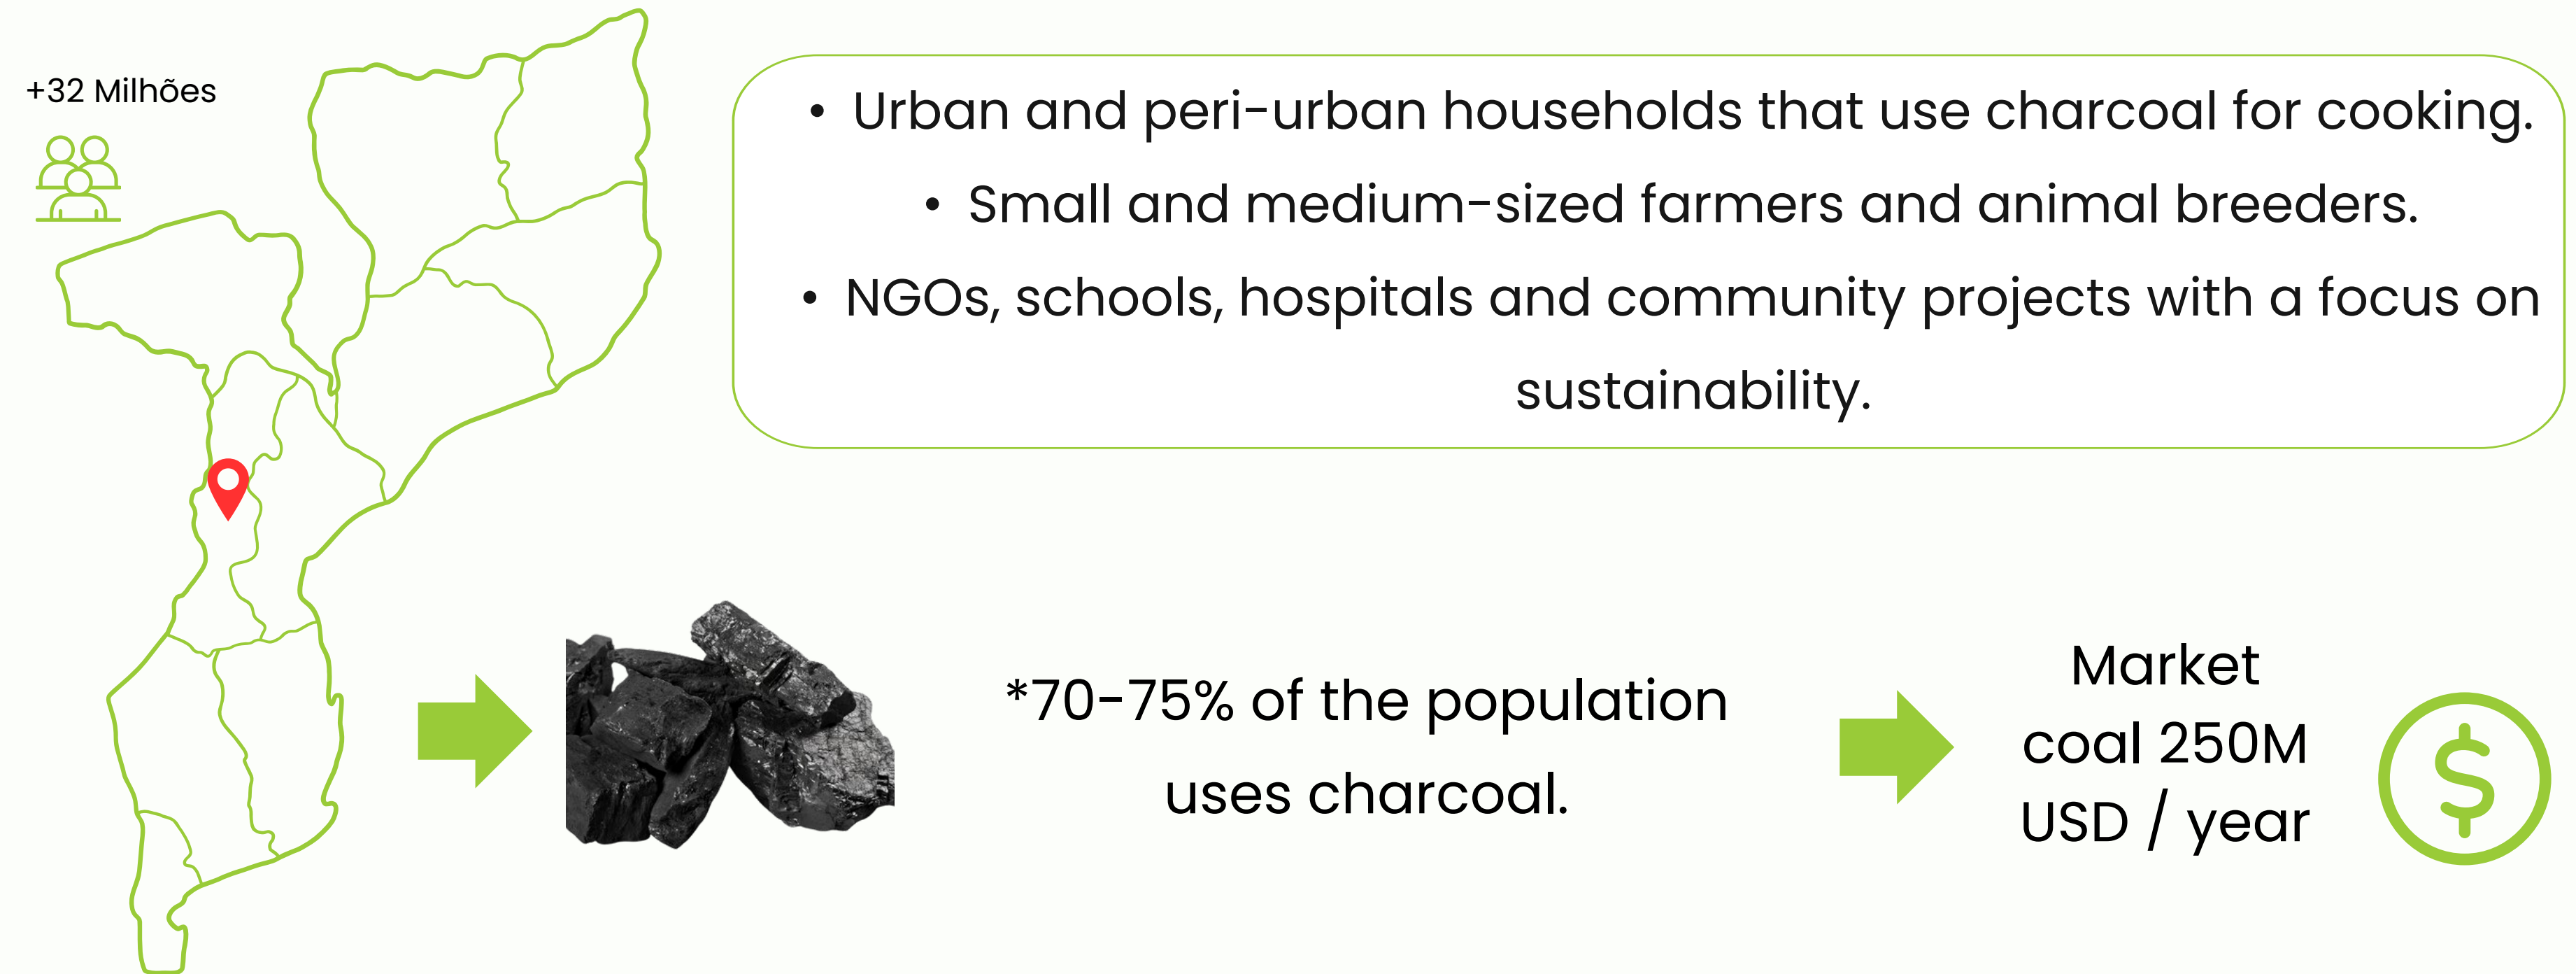

Promote communities that cook with clean energy efficiently and sustainably through the transformation of organic waste into energy and biofertilizers.

Briquettes made from agricultural and household waste, which cost less, produce less smoke and ash, burn longer, and produce a lot of heat compared to wood charcoal. Biodigesters are built locally with local materials.

Target Market and Opportunity

BUSINESS MODEL

150MZN/Unit

250L

16760MZN

TRACTION AND VALUE

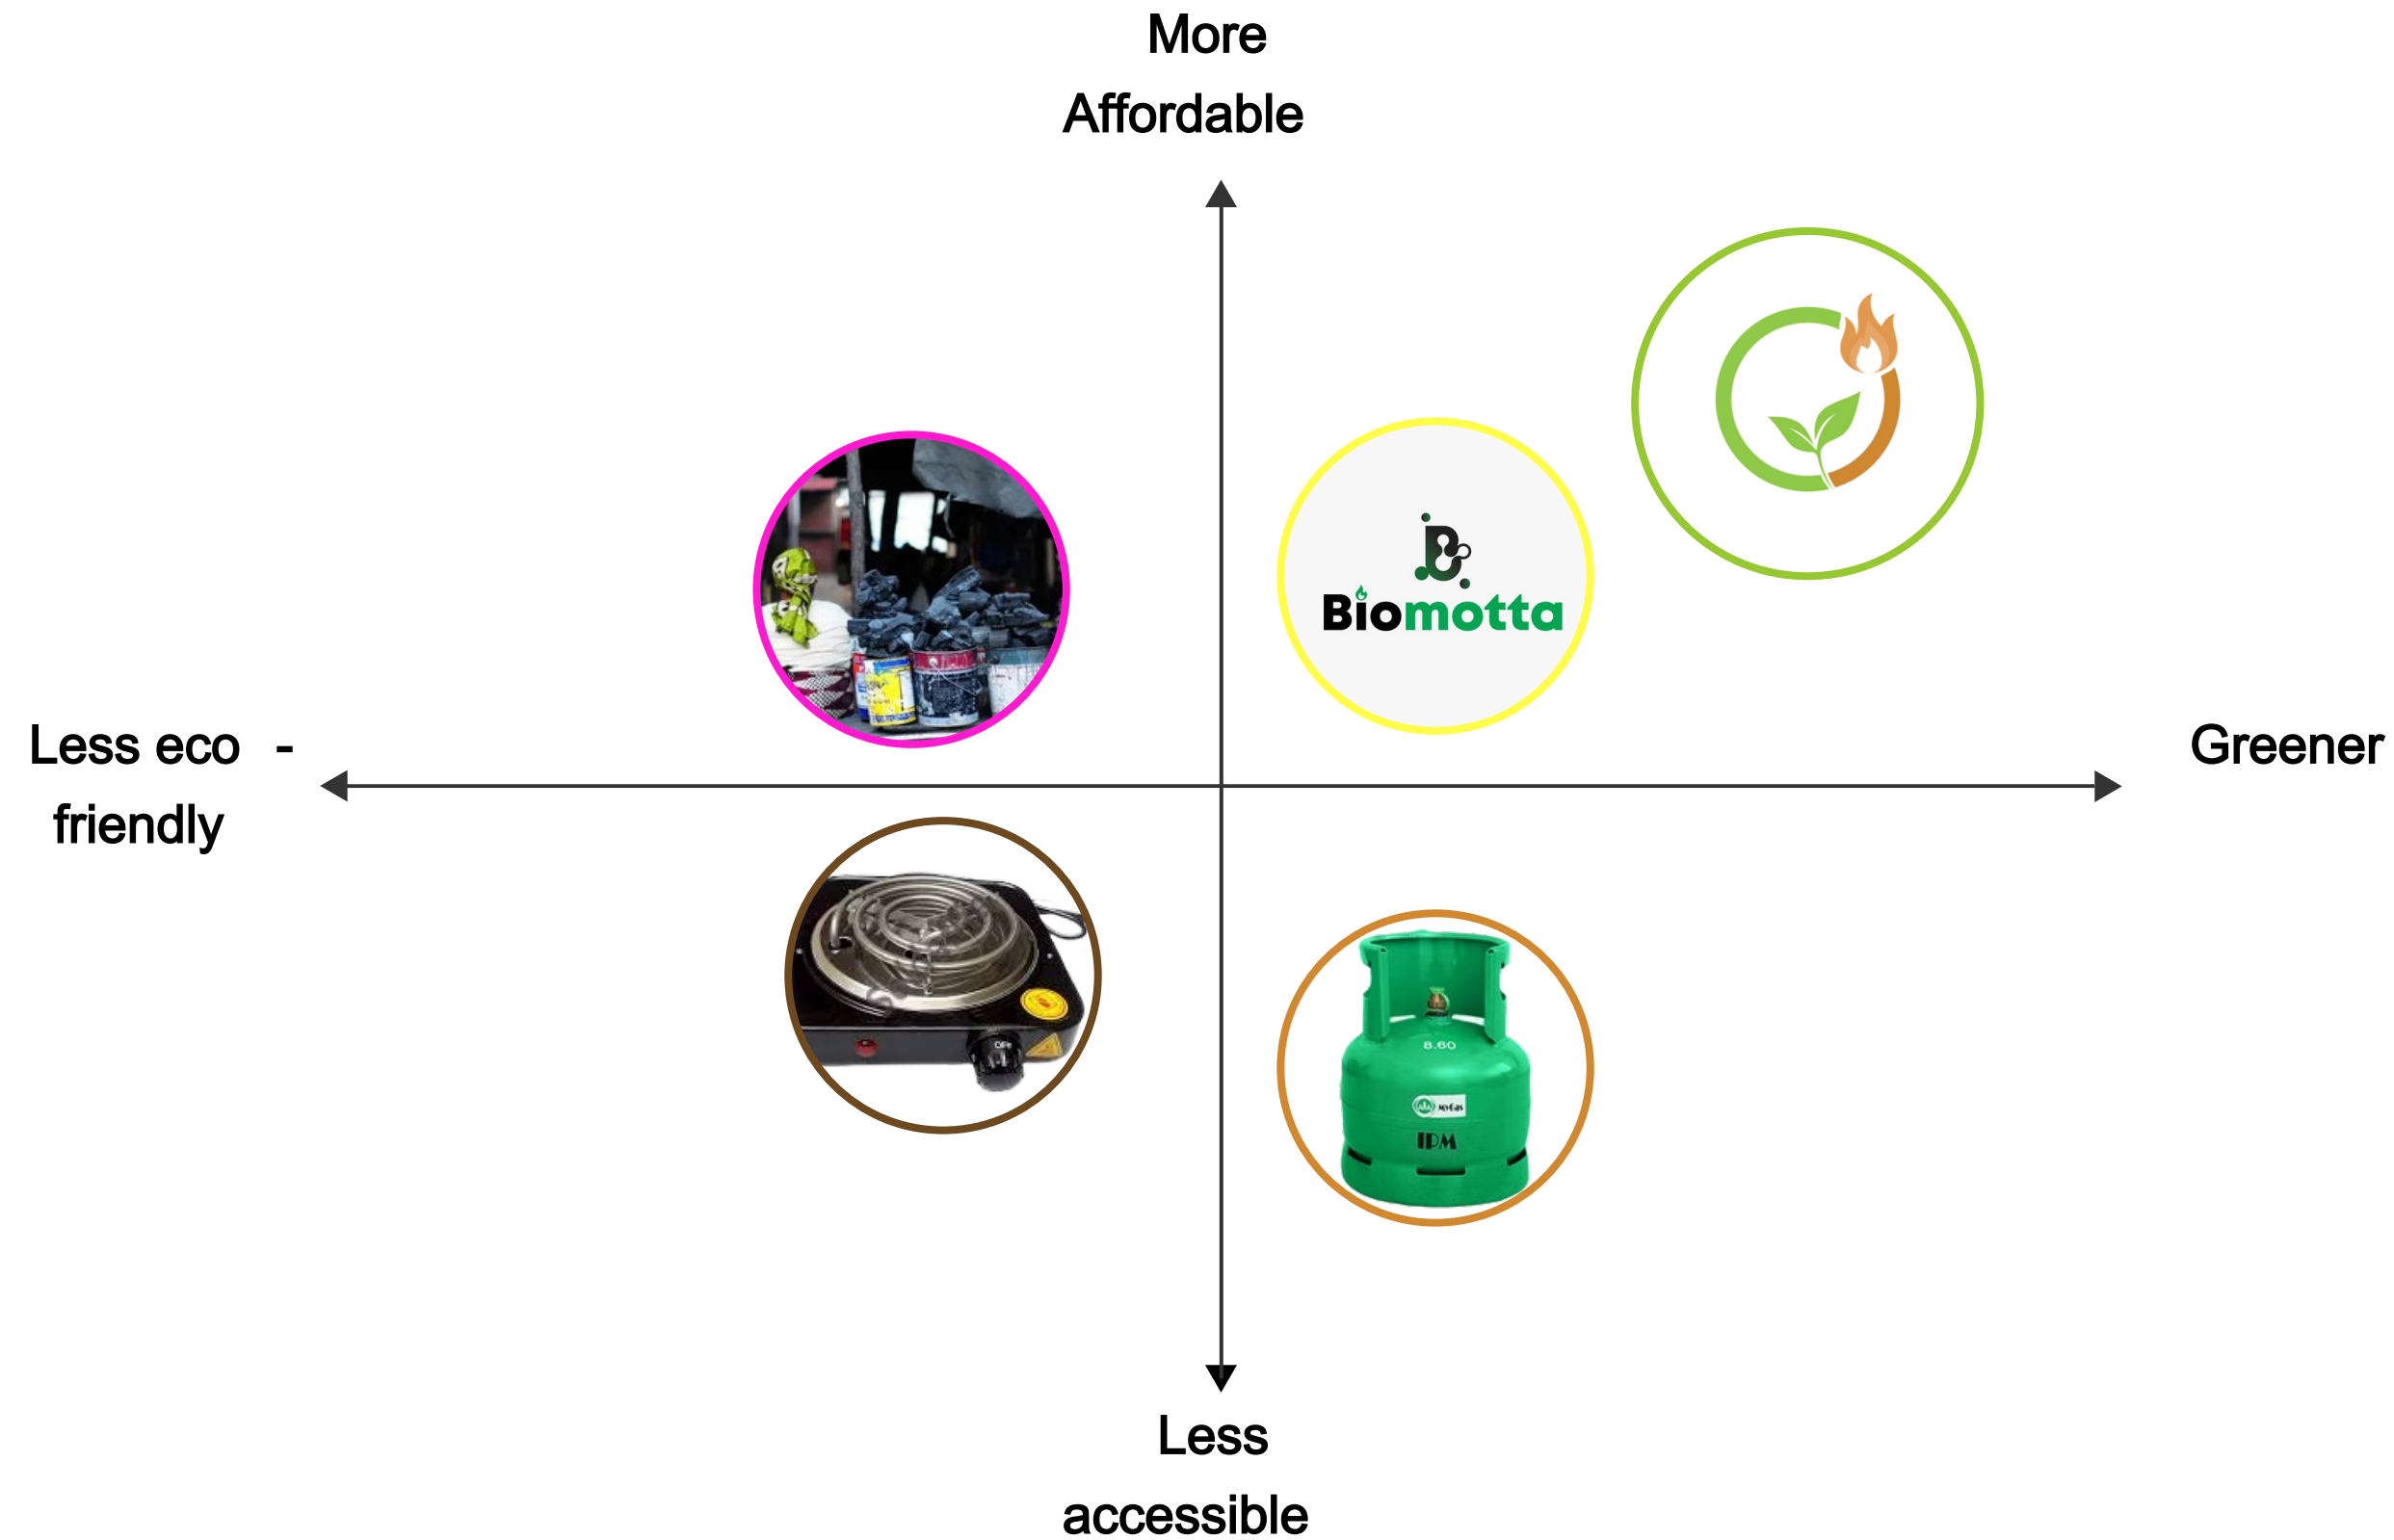

1

YEAR

- 35 regular briquettes customers (women).
- More than 4.8 tons of briquettes sold.
- 7 biodigesters sold to poultry farmers.
- 1 biodigester tank under construction (Trangapasso).
- 1-year maintenance contract signed with FRITM, LDA.
